.....

.....

**Days into season mated:.....**

**Dates mated:.....**

Free return mating offered to the same bitch with same stud dog if not in whelp.

We require written and photographic evidence in the form of an ultrasound scan from a Vet to confirm pregnancy/non pregnancy. If you are local, a scan can be arranged at my premises by my own trained Canine Ultrasound Technicians at a fee of £30. The ideal time for scanning is 28 - 35 days post matings but must be completed by day 42 for a free return mating to be offered on next season. So please make sure you have contacted me by the end of week 6 after final mating/Artificial Insemination.

Should your bitch not be maiden we require a written Veterinary report to support that your bitch is free from any Canine STI infections which could be passed onto my stud dogs and could also prevent your bitch from producing a live litter (Reabsorption). If you are unable to provide this, Artificial Insemination can be provided at a separate fee.

If another stud dog is used in the same season this will nullify your contract with me and no return mating will be given.

Stud fee is NON REFUNDABLE and cannot be transferred to a 3rd party.

**Disclaimer:**

Although every care is taken, I take no responsibility for any injury to the bitch or any persons associated with her whilst on my premises.

No pregnancy is 100% guaranteed.

The owners of visiting bitch confirm they have read, understood and agree with the terms of this contract.
